IT Support Hub Project
10/27/2026

The following showcases a working skeleton of my support hub. Below, users can file a new ticket or access a self-service area that showcases tips to resolve the issue they are currently facing. The technician queue is only viewable to those with the proper privileges, and it showcases all active tickets plus their assigned technician. It also gives the tech responsible the ability to add notes to the ticket as well as resolve it if they have remediated the issue.
